

TOP REASONS TO BUY PROJECT | CENTER

- **Easy-of-use** – ProjectCenter addresses the industry’s resistance to new technology by providing an intuitive, point-and-click user interface as well as an organized, logical menu structure using building-industry terminology.
- **Rapid Deployment** – Because ProjectCenter is a 100% web-based application and through the use of project templates, new projects sites can be setup by an administrator and available to the team in a matter of minutes.
- **“Software as a Service” (SaaS)** – As a subscription-based application hosted by the ProjectCenter team, ProjectCenter removes technological barriers by eliminating the need for a complex IT Infrastructure and management overhead.
- **Customer Focused** – the ProjectCenter support team is extremely customer focused and dedicated to their success, which is evident with our 93% yearly subscription renewal rate.
- **Tenure** – ProjectCenter has been in production for over 9 years and has built industry credibility, which a new application wouldn’t be unable to claim. Project teams working on a 3 to 4 year project are concerned about using a new application that doesn’t have a multi-year track record.
- **Existing Client Base** – Similar to “Tenure”, ProjectCenter has an existing customer base that provides credibility and has been a great source of references.
- **Breakthrough Pricing** – ProjectCenter is one of the only solutions for the building process to offer appropriate pricing and license options available for the mass market.
- **Domain Expertise** – the ProjectCenter team spent over fifteen years in the building industry and has been involved in over \$100 million worth of construction with responsibilities ranging from producing construction documents to jobsite supervision in order to complete commercial and private construction projects on-time and on-budget.
- **International Support** – In order to service a broader global market, ProjectCenter has multiple language support and is currently available in 9 different languages (English, French, Dutch, German, Spanish, Latin American Spanish, Portuguese, Italian, and Hebrew). Once translation is complete, a new language can be added within a matter of days.
